•	Programme number 3 (Standard 60 ° C cotton programme) and programme number 4 (standard 40 ° C cotton programme) are the standard washing programmes to which the information on the label and the fiche relates, that these programmes are suitable to clean normally soiled cotton laundry and that they are the most efficient programmes in terms of combined energy and water consumptions.
•	The actual water temperature may differ from the declared cycle temperature.
•	Program duration, energy consumption and water consumption values may vary according to wash load weight and type, selected extra functions, tap water and ambient temperature.
*	Based on 220 standard washing cycles for cotton programmes at 60°C and 40°C at full load and partial load, and the consumption of the low-power modes. Actual energy consumption will depend on how the appliance is used.
**	Based on 220 standard washing cycles for cotton programmes at 60°C and 40°C at full load and partial load. Actual water consumption will depend on how the appliance is used.
***	Based on test results of standard 60 ° C cotton programme at full load and partial load, and standard 40 ° C cotton programme at partial load.
